Each course section must have at least one session or meeting time.</p> <p>Example: An institution may have the need to schedule one course section as a 4 credit lecture and lab. They may enter this as a single session for 4 credits cross-referenced to code 11 above. Other institutional options for entry might include coding the 4 credit lecture and lab as one course section, with two sessions, one for lecture and one for the lab. These sessions might be coded as 3 credits cross-referenced to 10 and 1 credit cross-referenced to 30.</p>

	The 'between class time' varies from 5 to 15 minutes among the schools in the University System. The amount used should equal the amount of time between scheduled periods. For example, a school has a class meeting from 0900 to 0950, or 50 minutes, with another class period starting at 1000. The between class time should be 10 minutes. This between class time (of 10 minutes) should be added to the Class Ending Time only for this class.

**Course CIP Code** **CRS004**

Category	Academic / Course / Course / CRS004						
Description	A code associating each course with an academic discipline using the U.S. Department of Education's National Center for Education Statistics (NCES) CIP coding system. Formula funding is based on accurate reporting of CIP codes.

**Business Practices**

A business practice for updating CIP Codes is located in the Business Processes section of the GeorgiaBEST website. [https://www.usg.edu/georgia\\_best/application\\_development\\_and\\_support/business\\_processes](https://www.usg.edu/georgia_best/application_development_and_support/business_processes). Use the same CIP code for a course every term it is offered and for all sections of the same course in a single term.

CIP Codes beginning with the first two digits "32" are exclusive to Learning Support (Developmental Studies and Academic Assistance) Courses.

Business Law courses should have the first two digits of the CIP equal "52" (not "22," which indicates Law School courses).

Courses offered to meet physical education requirements (i.e., personal health, fitness and recreation) should be coded 36.0108.

Courses offered in Colleges of Education in Physical Education (i.e., Teacher Education) should be coded 13.1314.

Military Science courses should be coded in the 28.0000 or 29.0000 categories. These courses are not funded in the USG Funding Formula.

All CIP codes for distance education courses are assigned by the sending institution.

Business Practices	<p>The courses coded D or E must also have a specific External Site assigned to the course. Courses coded 60 (Practice Teaching) and 81 (Internship/Practicum) for the Session Schedule Type Code (Type of Instruction Code) will normally be coded as B, "Section with unassigned space" for the Section Location Code. Since the students in a single course normally gain this degree-related practical experience at multiple sites that are not "external sites" in the intended sense of that term, coding this field as "Section with unassigned space" avoids submitting multiple course records and an external site code for each student. An exception to this rule occurs if a specific meeting space, either on or off campus, is assigned to the course on a weekly basis throughout the term for periodic class meetings of the student teachers, interns, etc. with supervising faculty, then the Section Location Code should be coded either A or D to reflect that fact.</p> <p>This code identifies the basic nature of a course's facilities impact at the reporting institution and enhances the ADM Room Utilization data.</p>

	E	Entirely at a Distance - This course is delivered 100% through distance education technology. No visits to campus or designated site are required.	
	F	Fully at a distance - All or nearly all of the class sessions are delivered via technology. The course does not require students to travel to a classroom for instruction; however, it might require students to travel to a site to attend an orientation or to take exams. (NOTE: This is generally equivalent to delivering more than 95 percent of sessions via technology.)	
	H	Hybrid - Technology is used to deliver 50 percent or less of class sessions, but at least one class session is replaced by technology.	
	P	Partially at a distance - Technology is used to deliver between 51 and 95 percent of class sessions, but visits to a classroom (or similar site) are required. (NOTE: If a course is offered through two-way interactive video, then it should be coded partially at a distance because students must meet at a designated location.)	
	T	Technology enhanced - Technology is used in delivering instruction to all students in the section, but no class sessions are replaced by technology.

Business Practices	The question from which race is derived should present the categories of race in order of numerical frequency in the Georgia population, rather than alphabetically, in the following order: White, Black or African-American, Asian, American Indian or Alaska Native, Native Hawaiian or Other Pacific Islander. Federal research has found that following alphabetical order in the question categories results in substantial over reporting of the category "American Indian or Alaska Native".						

The "Race and Ethnicity Business Process" is located in the Business Processes section of the GeorgiaBEST website. [http://www.usg.edu/georgia\\_best/busproc\\_docs/Race\\_and\\_Ethnicity\\_BP\\_UserDoc.pdf](http://www.usg.edu/georgia_best/busproc_docs/Race_and_Ethnicity_BP_UserDoc.pdf)

This is self-reported data. The following abbreviated name may be used in text for this category: American Indian (instead of American Indian or Alaska Native); Black (instead of Black or African American); and Pacific Islander (instead of Native Hawaiian or Other Pacific Islander).

If more than one race code is entered in the Race block, the student will be reported in categories such as Two or more races, Three or more races, etc., or the category name will consist of the combination of races involved such as Asian and Black or African American.

Null will be reported as Unknown/undeclared.

20101		Until Summer 2009, ethnicity as Hispanic/Latino was a category of Race/Ethnicity. In Summer 2009, race and ethnicity were separated into two fields. In addition, changes were made to the categories of race. Before Summer 2009, Pacific Islanders were included in the same category as Asian students; in Summer 2009, Pacific Islanders were counted in a new category with Native Hawaiian students. The categories, 'Multicultural' and 'Unknown/undeclared' will not exist as of Summer 2009. This field is derived from SIRS Element S103.

# Ethnicity

SGR015

Category	Academic / Graduation / Student Graduation / SGR015														
Description	Ethnicity is a code describing whether or not a student is Hispanic or Latino. A Hispanic or Latino individual is one who is of Mexican, Puerto Rican, Cuban, South or Central American, or other Spanish culture or origin, regardless of race. Ethnicity refers to the heritage, nationality, lineage, or country with which a person identifies. People who identify themselves as Hispanic or Latino may be of any race.

20031		In Summer 2002, the student level "70 Graduate" was replaced with 72, 74, and 76.
19983		In Winter 1998, 'degree' in Code 51 was further specified to mean 'bachelor's degree'. In Summer 1998, Code 05, vocational-technical student enrolled in vocational-technical programs under contract with the Georgia Department of Technical and Adult Education, was dropped. In Fall 1998, the equivalent number of SCHs was changed from QCHs: Code 10, 0-44 changed to 0-29; Code 20, 45-89 changed to 30-59 and 45 changed to 30; Code 30, 90-134 changed to 60-89; Code 40, 135 to 90. In Summer 2000, Code 81, for First Professional B student enrolled in Forest Resources, Pharmacy (at Bachelor's level), Journalism, or Social Work (beyond sophomore level), at University of Georgia only, was dropped.
20111		10/2009 added Post-Baccalaureate student level codes 54 and 58
20131	Aug 14, 2012 12:00:00 AM	Turned off Edit VSGR049 due to Professional students being able to allow multiple degrees which could range from any value of degree levels.

	20012		Before Fall 2000, this element had the same name and number (S101-- Identification Number, Student), but it contained both SSNs and student identification numbers. In most cases, this was the SSN. However, dummy numbers were sometimes assigned in the format of IIX-00-XXXX, where II was the institution code number (General Operations Data Element NORMS) and the X's were consecutively assigned by the institution. The center digits remained 00 in such cases. After the implementation of Banner, a 'dummy' number might have contained a leading '@'.

Business Practices	<p>In rare cases, a student may not have a Social Security number. In the event a student SSN is not available, the institution may enter the Individual Taxpayer Identification Number (ITIN), a tax processing number issued by the Internal Revenue Service into the SSN field.</p> <p>The ITIN is a nine-digit number that always begins with the number 9 and has a 7 or 8 in the fourth digit (for example, 9XX-7X-XXXX). The IRS issues ITINs to individuals who are required to have a U.S. taxpayer identification number but who do not have, and are not eligible to obtain a SSN from the Social Security Administration (SSA). ITINs are issued regardless of immigration status because both resident and nonresident aliens may have U.S. tax return and payment responsibilities under the Internal Revenue Code.</p> <p>Since the SSN is one of the major indicators used to track student migration across the System, institutions should ensure that only a valid SSN or ITIN is entered in the Social Security number field. Institutions are prohibited from entering dummy Social Security or ITIN numbers in this field. Note that institutions assigned dummy student ID numbers in the past if students did not have a Social Security number. However, if the student does not have a valid Social Security number or a valid Individual Taxpayer Identification Number, this field should be blank (and the field of origin in SunGard SCT Banner, SPBPERS_SSN, should be blank). Institutions are responsible for removing invalid numbers if they plan to populate SPBPERS_SSN with numbers from the SPRIDEN_ID field.</p> <p>Data collection will capture any change in SSN or ITIN from term to term. For more information, see the USG Best Practices document "Converting from Use of Social Security Numbers to a Unique Identifier" (December 9, 2003).</p> <p>If the student does not have a valid Social Security Number, but has an Individual Taxpayer Identification Number (ITIN), enter the ITIN in this field. If the student has neither a SSN nor an ITIN leave this field blank. Do not enter 'dummy' SSNs in this field.</p>

**Business Practices**

The Regents Academic Interest Code monitors student programs of interest to ensure compliance with federal or state regulations, including federal financial aid (Title IV), and assists the system office in extracting data consistently across all institutions.

A Common Nursing Interest Concentration Code (ZNUI) has been created to monitor students' interest in nursing upon institutional admissions for funding compliance and reporting purposes. A translation table is available for institutions to translate their institutional major or program codes to the common code. All institutions using the common code 'ZNUI' must translate it to 'ZNUI' for collection purposes.

For additional information, please refer to the "Maintaining the Nursing Interest Concentration Code" and "Creating Translations for Data Collections" Business Practices, which are available on the GeorgiaBEST Business Processes webpage.

An Initial Teacher Certification Code (ZITC) has been created to track students enrolled in programs that lead to teacher certifications.

**Business Practices**

Advanced Standing Hours accepted for IB reflects the total number of hours accepted through International Baccalaureate Diploma Completion (IB) Programs.

For IB credit, this field applies to all undergraduates where matriculation date is on or after Fall 2008 (20092).

Credit hours accepted through external testing or as advanced standing examinations must be recorded through transfer articulation using the appropriate institution codes.

These data elements will be populated from data entered on Transfer Course Information (SHATRNS).

To be sure the information is pulled correctly for advanced standing hours, the following program code should be used for IB: '999906'.

Do not use your institution code on SHATRNS. If credit by exam is accepted while a student is enrolled, use 999906 as the institution code to record this credit on SHATRNS.

For students completing a RHSC curriculum, this average should include only the subset of the 16 RHSC courses taken in high school at the time of admission. Students graduating high school prior to 2012 are only required to have the 16 units. Starting in 2012, students are required to have 17 units.

Do not include additional academic units in calculation of HSGPA.

This field should be blank (null) for the following students: graduate and professional students; students entering undergraduate programs as home school students, auditors, GED students, students who graduated from a foreign high school, and students from ungraded high schools.

The field may be blank for transient or transfer students.

Do not update this field after admission.

	20211	Jun 12, 2020 12:00:00 AM	The Data Source was changed from SGBSTDN_TERM_CODE_MATRIC to SGVCCUR_TERM_CODE_MATRIC. Edited the GUI Label. Added SOAXREF Translation Code RGTERM.																						
	19992		Before Fall 1998, this was a three-digit field using fiscal year and quarter codes (1, 2, 3, 4). For example, Fall 1986 was coded 872. Beginning Fall 1998, 1, 2, and 4 were used to also indicate semesters. Before Spring 1999, the title was Matriculation Date. GIT used Code 3 through 1998 to indicate Winter Quarter.																						
	20232	Nov 23, 2022 12:00:00 AM	Added validation VSTE331.

20101		Until Summer 2009, ethnicity as Hispanic/Latino was a category of Race/Ethnicity. In Summer 2009, race and ethnicity were separated into two fields. In addition, changes were made to the categories of race. Before Summer 2009, Pacific Islanders were included in the same category as Asian students; in Summer 2009, Pacific Islanders were counted in a new category with Native Hawaiian students. The categories, 'Multicultural' and 'Unknown/Undeclared' will not exist as of Summer 2009. This field is derived from SIRS Element S103.

Description	Ethnicity is a code describing whether or not a student is Hispanic or Latino. A Hispanic or Latino individual is one who is of Mexican, Puerto Rican, Cuban, South or Central American, or other Spanish culture or origin, regardless of race. Ethnicity refers to the heritage, nationality, lineage, or country with which a person identifies. People who identify themselves as Hispanic or Latino may be of any race.

	20101		Until Summer 2009, ethnicity as Hispanic/Latino was a category of the Race/Ethnicity data element. In Summer 2009, race and ethnicity were separated into two fields. In addition, changes were made to the categories of race. Before Summer 2009, Pacific Islanders were included in the same category as Asian students; in Summer 2009, Pacific Islanders were counted in a new category with Native Hawaiian students. The categories, 'Multicultural' and 'Unknown/undeclared' will not exist as of Summer 2009. This field is derived from SIRS Element S103.

Business Practices	<p>Beginning Fall 2019: Learning Support requirement information will be automatically populated on the Georgia Requirements page (ZOAGARP) after running the Corequisite Learning Support Status process (ZORCLSP).</p> <p>If a student has a System or Institutional requirement this field should retain that value after matriculation; the requirement code for students would remain fixed thereafter as S or I. Enrollment Indicator would denote a student's progress in meeting exit requirements.</p> <p>The code for students coded S or I at initial entry should not be changed if the student later volunteers to enroll in Learning Support for MATH 1001/1101. Student volunteering for Learning Support for MATH 1001/1101 should be reported only for the semester(s) during which they were enrolled.</p> <p>The policy for Learning Support is located in section 2.9 of the University System of Georgia Academic and Student Affairs Handbook.  <a href="https://www.usg.edu/academic_affairs_handbook/section2/C769">https://www.usg.edu/academic_affairs_handbook/section2/C769</a></p>

Business Practices	<p>For students matriculating Summer 2002 and beyond, transfer information will no longer be pulled from SOAPCOL. Prior college information on all prior colleges attended is required for transfer students. See Transfer Articulation documentation and FAQs at the link provided.  <a href="https://www.usg.edu/georgia_best/application_development_and_support/business_processes/transfer_articulation_business_processes">https://www.usg.edu/georgia_best/application_development_and_support/business_processes/transfer_articulation_business_processes</a></p> <p>To ensure that the most current college codes are reported, institutions are required to verify new and unfamiliar college codes against the FICE and High School Code Translation System.  <a href="https://www.usg.edu/data_services/fice_hs">https://www.usg.edu/data_services/fice_hs</a></p> <p>For documentation on the FICE and High School Code Translation System, go to the link provided.  If an institution maintains the correct codes on the Source/Background Institution Code Validation Form (STVSBGI) in Banner, then the institution does not need to translate codes. However, if an institution does not use USO standardized codes in Banner, then it must translate its codes with this system. Institutions have two options: use the correct code in Banner or translate the code using the FICE and High School Code Translation System.  <a href="https://www.usg.edu/assets/data_services/documents/FICE_HS_Code_Translation_Institution_User_Guide_20150803.pdf">https://www.usg.edu/assets/data_services/documents/FICE_HS_Code_Translation_Institution_User_Guide_20150803.pdf</a></p> <p>For undergraduate students, enter the most previous institution attended.</p> <p>For student level 51, enter the institution which awarded the previous college degree.</p> <p>For all non-system Georgia institutions, including technical institutions, enter the FICE code beginning Summer 2002.</p> <p>For all out-of-state institutions, use the FICE code. Leave blank for students with no previous college. Beginning Summer 2002, enter for graduate and professional students only if they are transferring as a graduate or professional level student. Do not use this field to indicate the institution that granted a previous degree. ## Student Waiver Code

Fee Classification Code (Tuition and Fee Waivers)		SWC001					
Category	Academic / Student / Student Waiver Code / SWC001						
Description	Code (EDI value) identifying the type of fee transaction applied to students' transactions. Code also identifies the type of tuition or fee waiver a student receives.						
Data Type	A						
Length	5						
Format	X						
Collection Period	Current		Following		Annual	Monthly	Other
	Mid-term	End of Term	Mid-term	End of Term			
	Y	Y					
Business Practices	The detail code must be translated on SOAXREF (table name-SORXREF) using the label code RGTDETC for non-standard Regents' detail codes. Each transaction applied to the student's account will need to be collected to determine if the transaction is valid or if the transaction has been canceled. Fee waivers will not be extracted if the codes are not translated. Additional information concerning the Board of Regents' policies for fee waivers is available
